

Where do you stand on stilts?

STILTS SAFETY & MAINTENANCE FOR PLASTERERS

Over 60% of plasterers use stilts. So it stands to reason there's a real need for safety and maintenance training to ensure our plasterers use stilts in a correct and safe manner.

A Stilts Safety and Maintenance Course has been developed by Holmesglen TAFE and will be delivered in conjunction with the AWCIV. This four hour course designed specifically for plasterers working in the residential and some commercial sectors will:-

- Develop skills in the safe use of stilts.
- Outline maintenance & assembly procedures.
- On demonstration of competence provide you with a Stilts Safety & Maintenance Competency Card.

It's too risky not to know where you stand, particularly when it's so easy to book in and complete your Stilts Safety and Maintenance Course now.
